About

I'm passionate about bringing both the technical and visual aspects of digital products to life. User experience, beautiful pixels and writing clean accessible, human code matters to me. I sweat the details. And as a follower of John Maeda's Laws Of Simplicity, I agree that less is more.

I have a BA in Multimedia Design from Curtin University 🇦🇺, a Certificate of Web Development Immersive from Juno College (Formerly HackerYou) 🇨🇦, (and an Advanced Scuba Diving License from PADI 🇵🇭!)

I'm happiest when I'm creating, learning, exploring and thinking about how to make things better.
